

SOLUTIONS FOR MISSION-CRITICAL COOLING

WHY CHOOSE THE MACOMB GROUP?

Built to Keep Data Centers Running. Stocked to Deliver Fast.

With over 100,000 products available across over 30 service branches in 11 states and backed by our dedicated logistics fleet, The Macomb Group delivers unmatched supply chain reliability for mission-critical infrastructure projects.

From hyperscale and colocation facilities to modular and edge data centers, our scale, expertise, and deep inventory make us the ideal partner for this rapidly evolving industry.

Our team collaborates closely with engineers, general contractors and project managers to specify the right PVF solutions, ensuring every system runs efficiently, reliably, for the foreseeable future.

Our Expertise in Data Center Construction

Data centers demand uptime, efficiency, and long-term durability. From hyperscale builds to edge deployments, The Macomb Group provides the PVF backbone for mission-critical infrastructure including:

- **Cooling Systems** – Steel, stainless steel, copper and thermoplastic piping systems, automated valves, and press fittings engineered for high-performance chilled water loops and liquid cooling infrastructure.
- **Thermoplastic Fusion Solutions** – PP-RCT piping systems supported by our fusion specialists, offering fusion training and on-site support, with fusion equipment rentals available for efficient installation.
- **Precision Flow Control** – Ball, gate, and butterfly valves along with automated valve solutions designed to maintain stable system performance
- **Compressed Air Systems** – Oil-free compressors and pneumatic solutions for valve actuation, fire suppression, and clean air delivery.
- **Fabrication & Cutting Tools** – On-site and pre-fabricated assemblies for faster project completion with fewer delays.
- **Emergency Support** – 24/7 service, in-house fabrication and responsive logistics keep projects moving and crews working.

From Cooling to Compliance – We've Got You Covered With:

Unmatched Inventory Depth – Steel, stainless, copper and thermoplastic piping systems with the valves and fittings required for demanding cooling systems

Proven Industry Knowledge – Decades of experience supporting industrial, mechanical and infrastructure projects.

National Reach, Local Service – 30+ locations across 11 states with same-day will-call pickup and coordinated delivery schedules.

Reliability at Scale – Strong manufacturer partnerships and a dedicated trucking fleet ensure dependable product availability.

Future-Focused Solutions – Products and services engineered for AI-optimized, high-density data centers and advanced liquid-cooling environments

MISSION CRITICAL PVF SOLUTIONS

The Macomb Group Provides Sustainable Fluid Management Solutions for High-Performance Data Centers

As the demand for data centers grows, so do the challenges of ensuring uptime, efficiency, and reliability. The Macomb Group provides pipe, valves, fittings and engineered mechanical solutions designed to support high-performance data center infrastructure.

PIPING SYSTEMS — High-Performance Materials for Cooling & Water Transfer

We supply PP-RCT, PVC, and CPVC engineered plastics, stainless steel, and carbon steel piping solutions—engineered for durability, corrosion resistance, and superior thermal performance. These systems are designed to withstand extreme thermal stress, minimize downtime, and deliver consistently high uptime with reduced maintenance requirements.

Supporting Products:

- Pipe hangers & supports
- Expansion control solutions
- Professional installation tools

PUMPS — Flow Control Engineered for Efficiency & Reliable Uptime

Macomb offers a wide range of centrifugal, diaphragm, metering, and self-priming pumps—engineered to deliver energy efficiency, continuous operational reliability, and smooth performance under the most demanding conditions.

Common Uses:

- Cooling water circulation
- Emergency backup flow
- Coolant and chemical transfer

INSTRUMENTATION — Precision Monitoring & Control for Critical Systems

We deliver instrumentation designed to maximize system visibility, automation, and compliance. These tools give operators confidence in real-time performance and reliability.

Product Offerings Include:

- Level sensors — monitor tank capacity & reserves
- Pressure & temperature gauges — stabilize critical systems
- Flow meters — track coolant & process fluid movement
- Control panels & automation — enable remote management

TANKS — For Cooling, Reuse & Emergency Supply

Our FRP, stainless steel, and PE tanks meet strict chemical compatibility and environmental standards. Available in both above- and below-ground options, built for long-term reliability and can be customized for your specific operational requirements.

Typical Applications:

- Chilled water & TES systems
- Water reclamation & treatment
- Fire protection & backup supply

THE MACOMB GROUP DELIVERS:

High-Performance PVF Products for Mission-Critical Cooling

The Macomb Group provides high-performance, corrosion-resistant piping systems and fluid-handling components designed to support mission-critical cooling infrastructure.

PVF Systems Designed for Efficiency and Compliance

Innovative products and systems that promote energy efficiency, minimize water usage, and help achieve carbon-reduction goals.

Strategic Inventory and Logistics That Keep Projects Moving

With more than 30 branches across 11 states, backed by regional distribution centers and our 175+ truck internal fleet, Macomb ensures critical products are in stock and delivered when needed to eliminate downtime.

Technical Expertise for Complex Data Center Builds

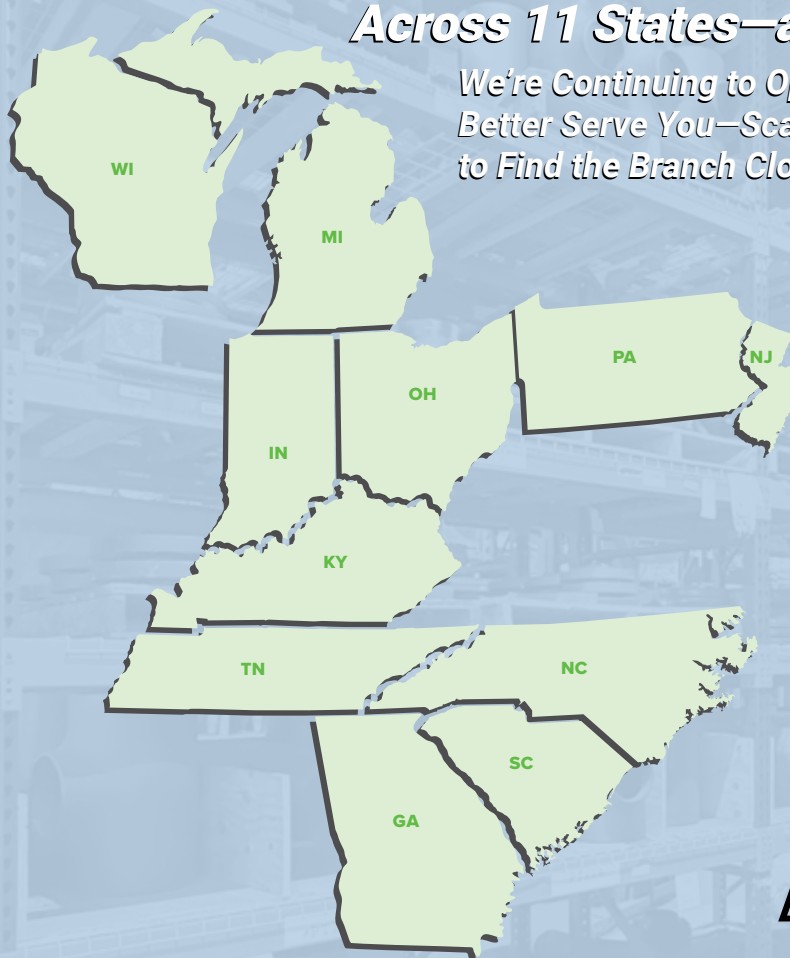

Our product specialists offer end-to-end support in system design and fabrication, leveraging extensive experience to deliver solutions for even the most complex project requirements—keeping your projects on schedule and on target.

24/7 Supply and Support

When uptime is non-negotiable, our team delivers the products, service and expertise required to keep critical systems operating, and emergency support your operations can depend on.

The Macomb Group: 31 Locations Across 11 States—and **GROWING**
