

SOLUTIONS FOR MISSION-CRITICAL COOLING

WHY CHOOSE THE MACOMB GROUP

Built to Keep Data Centers Running. Stocked to Deliver Fast.

With over 100,000 products available across 31 service branches in 11 states—and backed by our dedicated logistics fleet—The Macomb Group delivers unmatched supply chain reliability.

Whether you're building a hyperscale facility, a colocation site, or modular and edge data centers, our scale, expertise, and deep inventory make us the ideal partner for this rapidly evolving industry.

Our team collaborates closely with project managers and engineers to specify the right PVF solutions, ensuring every system runs efficiently, reliably, and sustainably.

Our Expertise in Data Center Construction

Data centers demand uptime, efficiency, and long-term durability. From hyperscale builds to edge deployments, The Macomb Group provides the PVF backbone for mission-critical infrastructure including:

- **Cooling Systems** – Stainless steel pipe, automated valves, and press fittings engineered for high-performance chilled water and liquid cooling loops.
- **Precision Flow Control** – Ball, gate, and butterfly valves to ensure leak-free, efficient fluid management.
- **Compressed Air Systems** – Oil-free compressors and pneumatic solutions for valve actuation, fire suppression, and clean air delivery.
- **Fabrication & Cutting Tools** – On-site and pre-fabricated assemblies for faster project completion with fewer delays.
- **Emergency Support** – With our 24/7 service and in-house fabrication shops, we keep your projects moving and your systems online.

From Cooling to Compliance – We've Got You Covered With:

Unmatched Inventory Depth – Stainless, carbon steel, copper, and thermoplastics for every cooling and piping need.

Proven Industry Knowledge – Decades of experience supporting power generation, utilities, and high-spec industrial builds.

National Reach, Local Service – 31 locations across 11 states, with same-day will-call pickup and multi-slot deliveries.

Reliability at Scale – Dedicated trucking fleet, strong vendor partnerships, and guaranteed supply chain dependability.

Future-Focused Solutions – Products and services designed for AI-optimized and high-density data centers.

MISSION CRITICAL PVF SOLUTIONS

The Macomb Group Provides Sustainable Fluid Management Solutions for High-Performance Data Centers

As the demand for data centers grows, so do the challenges of ensuring uptime, efficiency, and reliability. The Macomb Group delivers the proven pipe, valves, fittings, and engineered solutions you need to keep your systems running without compromise.

PIPING SYSTEMS - High-Performance Materials for Cooling & Water Transfer

We supply PP-RCT, PVC, and CPVC engineered plastics, stainless steel, and carbon steel piping solutions — chosen for durability, corrosion resistance, and superior thermal performance. These systems are designed to withstand extreme thermal stress, minimize downtime, and deliver consistently high uptime with reduced maintenance requirements.

Supporting Products:

- Pipe hangers & supports
- Expansion control solutions
- Professional installation tools

PUMPS - Flow Control Engineered for Efficiency & Reliable Uptime

Macomb offers a wide range of centrifugal, diaphragm, metering, and self-priming pumps — engineered to deliver energy efficiency, continuous operational reliability, and smooth performance under the most demanding conditions.

Common Uses:

- Water circulation
- Emergency backup flow
- Coolant and chemical transfer

INSTRUMENTATION - Precision Monitoring & Control for Critical Systems

We deliver instrumentation designed to maximize system visibility, automation, and compliance. These tools give operators confidence in real-time performance and reliability.

Product Offerings Include:

- Level sensors — monitor tank capacity & reserves
- Pressure & temperature gauges — stabilize critical systems
- Flow meters — track coolant & process fluid movement
- Control panels & automation — enable remote management

TANKS - For Cooling, Reuse & Emergency Supply

Our FRP, stainless steel, and PE tanks meet strict chemical compatibility and environmental standards. Available in both above- and below-ground options, built for long-term reliability and can be customized for your specific operational requirements.

Typical Applications:

- Chilled water & TES systems
- Water reclamation & treatment
- Fire protection & backup supply

BUILT TO SAY YES

MACOMB GROUP DELIVERS:

High-Performance PVF Products for Mission-Critical Cooling

The Macomb Group provides high-performance, corrosion-resistant piping and fluid-handling products built to support advanced liquid cooling infrastructure.

PVF Systems Designed for Efficiency and Compliance

Innovative products and systems that promote energy efficiency, minimize water usage, and help achieve carbon-reduction goals.

Strategic Inventory and Logistics That Keep Projects Moving

With more than 30 branches across 11 states, backed by regional distribution centers and our 100+ truck internal fleet, Macomb ensures critical products are in stock and delivered when needed to eliminate downtime.

Custom PVF Plastics Engineering Knowledge for Complex Data Center Builds

Our specialists partner with you to design and supply tailored system solutions — from fabrication services to complex assemblies — so your projects stay on schedule.

24/7 Supply and Support Keeps Your Data Center Project On-time and On-Budget

When uptime is non-negotiable, our team responds and can provide around the clock support with the products, technical expertise, and emergency support your operations depend on.
