# **FIRE FABRICATION DIVISION**

# FIRE FABRICATION DIVISION

## Fire Protection Fabrication for Critical, Schedule-Driven Projects

The Macomb Group Fire Fabrication Division partners with licensed fire protection contractors, engineers, and project teams to support fire protection systems where accuracy, coordination, and reliability are essential. Backed by more than 60 years of fire protection and PVF experience, we provide a comprehensive mix of trusted products, fabrication services, and logistics support designed to reduce field labor, streamline installation, and protect project schedules.

We approach fire fabrication with a clear objective: deliver installation-ready systems that work the way they were designed to work in the field. From early planning through final delivery, our specialists focus on accuracy, organization, and responsiveness—helping customers execute confidently on projects where life safety, compliance, and performance matter most.

### Fabrication Capabilities Built for Installation Readiness

Our fabrication services are designed to support how fire protection systems are installed—not just how materials are supplied. By preparing, organizing, and staging components before they reach the jobsite, we help reduce rehandling, minimize congestion, and improve productivity for field crews.

And we have the 'YES' we will get it done attitude that comes with The Macomb Group's many years of experience solving our customers' most complex fire protection and fabrication projects

### Capabilities Include:

- Plasma cutting
- Grooving, beveling, and threading
- Welding
- Fabricated black and galvanized steel pipe
- Pre-engineered subassemblies fabricated for faster, more efficient installation
- Coordinated jobsite delivery using our fleet of trucks

### Pipe Systems and Materials

The Macomb Group supplies pipe and fabricated materials to customer specifications for a wide range of fire protection application uses, including Sch 10, 40, 80 SMLS in:

- Black steel fire sprinkler pipe
- Galvanized fire sprinkler pipe
- Grooved and threaded configurations
- Fabrication-ready cut lengths and standard stock
- Stainless steel and specialty materials for select applications

*Pipe sizes and fabrication options are tailored to project requirements and industry best practices. Contact your local Macomb representative for more information.*

# MISSION CRITICAL CAPABILITIES

## Data Center Fire Protection & PVF Cooling Infrastructure Expertise

As demand for data center capacity accelerates, fire protection systems must integrate seamlessly with mechanical, cooling, and life-safety infrastructure. The Macomb Group brings extensive experience supporting data center environments, where coordination, precision, and schedule certainty are critical.

Our teams support hyperscale, colocation, enterprise, and modular data center projects with fire protection pipe, valves, fittings, and fabricated assemblies designed to align with complex installation sequences and fast-track construction schedules. Beyond traditional fire protection scope, we offer deep expertise in PVF cooling infrastructure, supporting chilled water, heat rejection, and process piping systems throughout the facility.

By combining fabrication services, tagging and staging practices, and broad PVF product knowledge, we help customers coordinate fire protection work alongside mechanical and cooling installations—supporting parallel workflows and reducing friction on congested jobsites.

## FIRE PROTECTION SYSTEMS, PRODUCTS & REPRESENTATIVE MANUFACTURERS

### VICTAULIC® GROOVED SYSTEM

FireLock™ Installation-Ready™ Couplings and Fittings  
FireLock™ Valves, FireLock™ Innovative Groove System | IGS™

### SPRINKLERS & DEVICES

Victaulic® FireLock™ NXT

**DEVICES:** Dry Pipe Valves, Preaction Valves & Deluge Valves,  
Fire-Pac™ Victaulic FireLock™ Sprinklers, Potter  
Nitrogen Generators

### PIPE MANUFACTURERS

Wheatland, Bullmoose, Youngstown, Nucor

### CAST / DUCTILE / MALLEABLE FITTINGS NIPPLES / WELDED OUTLETS

Ward, Anvil Smith Cooper, Quality Pipe, Island Fitting,  
Sigma, Aegis

### FLANGED FITTINGS & ACCESSORIES

NAPAC, Anvil Smith Cooper, Ward

### HANGERS / STRUT

Erico, PHD, Anvil Smith Cooper, B-Line

### FLEX DROPS

VicFlex™

### CPVC SPRINKLER PIPE & FITTINGS

Spears Manufacturing

### BACKFLOW SOLUTIONS

Ames, Watts, Conbraco (Apollo), Febco, Wilkins

### MONITORING & ALARM DEVICES

System Sensor, Potter Electric

### UL / FM VALVES

Nibco, FPPI, Anvil, Apollo, Brecco, Victaulic, Kennedy

### FIRE DEPARTMENT / CONNECTION / BRASS ATTACHMENTS

Potter Roemer, Guardian Fire Equipment, Brecco, Croker

### ACCESSORIES / HANGERS

FPPI, Red Head, Sammies, Gauges & Gauge Kits, Cabinets,  
Antifreeze, Threaded Rod, Caulking, Pipe Dope & Anaerobic Dope

### FABRICATION

Hydratec, Welding, Grooving, Threading, Fabricated Black &  
Galvanized Pipe, Stainless

### COMPRESSORS

C-Aire, Jenny Air, General Air

### HYDRAULIC CONTROL VALVES

Victaulic / Bermad

# MACOMB FIRE FABRICATION

Fire protection systems demand accuracy, responsiveness, and partners who understand what's at stake. The Macomb Group Fire Fabrication Division combines proven products, advanced fabrication capabilities, and experienced specialists to support critical projects from planning through installation. With a growing regional footprint, in-house logistics, and our own fleet of delivery trucks, we provide dependable jobsite support across our areas of operation—helping customers stage materials efficiently, protect schedules, and keep work moving.

The Macomb Group carries a large selection of the Fire Protection Industry's finest products. We inventory components for wet and dry sprinkler systems, special hazard suppression systems, underground supplies, accessories and more.
